

Eyepartner HD TikiLIVE Plug-and-Play Broadcaster - \$3,500 MSRP

Eyepartner Inc., the creators of TikiLIVE and The HD Wave, has just integrated the first Plug-and-Play Broadcasting Unit with their patent pending high definition streaming solution. The broadcaster comes pre-installed with The HD Wave broadcasting software and is ready to start streaming a LIVE HD Video source as well as deliver a previously recorded or edited video as a LIVE stream.

HD TikiLIVE 1U Broadcaster Front

HD TIKILIVE 1U Broadcaster Back

This product combines low cost and high-performance with unparalleled simplicity in a compact Ethernet based audio/video streaming appliance specifically designed for commercial, institutional, and industrial applications such as:

- Enterprise Broadband Streaming , Retail Satellite Video Distribution
- Mobile Video Communications, Corporate Broadcast, Training
- Government / Inter-Agency Communications, Distance Learning
- Cable News / Sports / Advertising, Hotel Video Channel, Hospitals
- Security / Surveillance / Public Safety, IPTV / Internet Streaming

How it works

Utilizing the plug-and-play HD broadcaster, Eyepartner has advanced their Turn-Key IPTV network solution, TikiLIVE, by giving a content producer a rack-mountable encoding unit that can be connected to 480, 720p, 1080i and 1080p video sources. A network simply needs to connect the unit to the video source as well as high speed internet connection and it can instantly stream content to their audience. The unit is 1U design rack mountable so it can be installed easily and stacked in your studio to support multiple channels for your network without having to invest in a major studio remodel.

The rack mounted broadcaster is perfect for OTT (over the top) IPTV deployments as it allows for both Multicast and Unicast configurations. The streaming solution supports both flash and H.264 video formats so it can be configured to be viewed on mobile devices, home computers or set top boxes.

By integrating the Plug-and-Play Broadcaster a network manager enables their studios or content producers to have an out of the box solution for monetizing their content by getting their High Definition content online with no additional hardware needed. By streaming through the TikiLIVE network one can drastically increase their return on investment (ROI) by charging the audience monthly subscriptions to view a channel, or charge Pay-Per-View for specific events.
