# TIKILIVE

TikiLIVE Monitor What is it?

Cloud Based Live Streaming and Archiving for your Cameras

TikiLIVE Monitor is a cloud-based streaming solution that allows you to quickly configure and monitor streaming cameras for Security and Destination Broadcasting Purposes.

Archive on the Cloud

TikiLIVE Monitor also allows the business or home users to enable a cloud based recording service. Recordings can be downloaded to a local hard drive for reference purposes or deleted permanently to clear out one's space on the cloud.

Main Entrance Camera

Customized Group Packages available to let you pay for the service you require

TikiLIVE Monitor offers an array of different packages so you can scale your live streaming and recording account to fit your business needs.

We offer packages that fit various business models such as total recorded hours per month, as well as the number of cameras that can be configured.
