

TIKILIVE IPTV MIDDLEWARE

Compete head-to-head with major TV providers with TikiLIVE IPTV Middleware. For a fraction of the cost you can create and manage channel packages as the admin of a TikiLIVE network. Set retail prices for individual channels or bundle them together based on your clients' preferences. Our middleware also allows you to manage your subscribers, track content owner royalties and create financial reports all from the simple-to-use dashboard.

From their own account dashboard your subscribers are able to pick which a la carte channels and which channel bundles they want. Unlike traditional TV providers where a subscriber might select an expensive 200-channel package to get the 10 channels he actually watches, this solution lets him select only the content he wants. This saves him money and saves you money in the licensing fees you pay to provide his content.

Features

- Compete head-to-head with major TV providers for a fraction of the cost
- Create and manage channel packages and their prices
- User picks which a la carte channels and bundles they want
- User manages their subscriptions from account dashboard
- Manage subscriptions and royalties from an easy-to-use interface
